### Crosstime Bus

(Chorus)

**Am**                    **C**  
Looking for a place  
          **D**                **E7**  
Lost in time and space?  
          **Am**            **C**  
Just one low fare  
          **D**    **E7**  
Takes you anywhere.  
          **Am**    **C**  
I'm the crazy cuss  
          **D**                **E7**  
On the Crosstime Bus.  
          **Am**                **E7**            **Am**  
Come on and take a ride with me.

**C**                    **D**                **E7**  
I'll take you on a journey to Oz.  
          **C**                    **D**                **E7**  
If they ask why, say "Just because."  
          **Am**                    **C**  
Any fairy tale land  
          **D**                    **E7**  
Of which you're a fan  
          **Am**                    **E7**                **Am**  
Can be your destination with me.

If outer space  
Is your choice of place,  
From Luna City bars  
To the sands of Mars.  
If you'd have a little fun  
On the asteroid run,  
Come on and take a ride with me.

A torch ship's just the thing  
To take you from here to the ring.  
The system's free  
At accel one gee.  
Come on and take a ride with me.

(Chorus)

**F** **G** **Am**  
I'll take you to the worlds of the Hub  
**F** **G** **Am**  
Or down into Nemo's sub.  
**F** **G** **Am**  
You can be any place that you want to be  
**G** **E7**  
On the Crosstime Bus with me.

If you don't want to change,  
Just rearrange.  
If you're looking for the door,  
'Cause your life's a bore.  
Just one more pass  
Through the Looking Glass.  
Come on and take a ride with me.

Ladies, tired of your man?  
You want to be holding another hand?  
If the name of the game  
Is to fan an old flame,  
Come on and take a ride with me.

Anything you want to know,  
Just step aboard and we'll go.  
One quick slip and we're there.  
The Crosstime Bus goes everywhere.

(Chorus twice)

Come on and take a ride with me.  
Come on and take a ride with me.
